

Samsung Droid Charge Battery Replacement

Replace the battery in your Samsung Droid Charge.

Written By: Luke Gordon

INTRODUCTION

Replace the battery in your Samsung Droid Charge. Remove the battery before disassembling or reassembling the device.

PARTS:

- [Samsung Replacement Battery EB504465YZ](#) (1)
-

Step 1 — Rear Cover

- Open up the back case on the phone from the groove in the bottom of the phone.
- ① You can do this by inserting a fingernail or similarly thin object into the groove and pulling up with mild force.

Step 2 — Battery

- ① Below the left part of the bottom of the battery area there will be a groove large enough to fit in a finger or screw driver head.
- Use the groove to lever out the battery gently, in order to not damage either the battery or phone. Store the battery in a safe place.

To reassemble your device, follow these instructions in reverse order.
